

# Anywhere Door: Travel Anywhere

What does travel look like in the future? Has it been a long time since you last travelled abroad? Are you under travel restriction? Have you cancelled your travel schedule this year? Do you miss the sea, beach, sky, sunshine and him/her?

Close your eyes, think of one place in your dream. Concentrate on it. Just a moment. I will take you to that place. Now, open your eyes. There is an Anywhere Door (also called Dokodemo Door) that can take you to any place on earth. Just open the door and walk through it. You will go to your dreaming place.

Target users: family, children, travellers, students, or anyone who want to travel to other places

Interaction: mind control, motion interaction

Technology: 3D projector, Arduino UNO, special glasses with headphone and brain sensor

Before entering the room, you need to wear special glasses. The brain sensor on the glasses can detect your brain activity, Projector will show you some places. When you concentrate on your dream place, your brain generates enough electricity to send a message to the 3D projector. Then, you open the door and entering to the place you want to travel to.
